

Rodstar 3.2

Specialty German sports car maker Funke & Will will display its new Yes! Roadster 3.2 at this year's Chicago Auto Show. The second generation of the niche performance car has grown significantly larger than its predecessor, which first went on sale in 2001.

Measuring 3809mm long and 1804mm wide, the 890kg Roadster features larger engines and a longer (2454mm) wheelbase, stretching the car's profile.

Specialty German sports car maker Funke & Will will display its new Yes! Roadster 3.2 at this year's Chicago Auto Show. The second generation of the niche performance car has grown significantly larger than its predecessor, which first went on sale in 2001.

Measuring 3809mm long and 1804mm wide, the 890kg Roadster features larger engines and a longer (2454mm) wheelbase, stretching the car's profile. The wedge-shaped ascending side line communicates its newfound dynamism, accentuated by broad rear haunches and gaping air intakes that feed air to the mid-mounted 3.2-liter 255hp V6 powerplant. A turbo version of the new Roadster also features a specially developed rear wing spoiler to create the downforce required to transfer 355hp to the tarmac via the rear wheels.

Inside, the interior is described as a 'human-machine interface' and is ensconced by high quality materials combined with chrome and leather applications. Optional equipment and accessories include driver and passenger airbags and a multimedia navigation system.
